

VIETNAM'S STRATEGIC ADVANTAGES IN GREEN MATERIALS MANUFACTURING

- Favorable geographical location & strong regional connectivity
- Emerging destination for the global materials industry
- Abundant and locally available green raw materials
- Competitive production costs & a large labor force
- Government-backed green development policies
- Technological innovation & automation in manufacturing
- Growing international reputation

PARTICIPATING BENEFITS

1. BUSINESS NETWORKING & INTERNATIONAL PARTNERSHIPS

- Access to manufacturers, contractors, architects, and developers
- Connect with equipment suppliers and technology partners
- Opportunities for contract signing, licensing, & tech collaboration
- B2B meetings organized by the expo with interpreter support

2. PRODUCT SHOWCASES & GREEN SOLUTIONS

- Live product & tech demonstrations at your booth
- Strengthen brand visibility in the green building sector
- Attract investor & project developer interest

3. MARKET EXPANSION & EXPORT OPPORTUNITIES

- Meet importers from Japan, South Korea, Singapore, EU
- Explore export channels with support from trade offices
- Connect with global partners for production and distribution

4. INDUSTRY TREND UPDATES

- Discover the latest green innovations and technologies
- Join forums, technical workshops, and case studies

GREEN BUILDING MATERIALS - THE FOUNDATION FOR SUSTAINABLE ARCHITECTURE

As the trend of green architecture continues to gain momentum globally, environmentally friendly building materials have become an essential demand of modern architecture and the construction industry as a whole. The transition from “traditional construction” to “green - smart - sustainable construction” requires a material ecosystem that is innovative, high-performance, and compliant with international environmental standards.

GMTexpo is a large-scale event that, for the first time in Vietnam, brings together all key elements across the green building materials value chain - from raw materials, production, technology, application, to integrated construction solutions.

10.000m²
exhibition
space

EXHIBITION
SCALE

10.000+
visitors

100+
supply chain
groups

COUNTRIES
REPRESENTED

 SINGAPORE	 USA
 CHINA	 UK
 SOUTH KOREA	 AUSTRALIA
 THAILAND	 JAPAN
 ITALY	 CANADA
 INDIA	 EU
 RUSSIA	 TAIWAN

STRATEGIC OBJECTIVES OF THE EXHIBITION

PROMOTE INNOVATION IN THE FIELD OF ENVIRONMENTALLY FRIENDLY
BUILDING MATERIALS

FACILITATE EFFECTIVE B2B TRADE CONNECTIONS BETWEEN DOMESTIC
AND INTERNATIONAL ENTERPRISES

POSITION VIETNAM AS A LEADING HUB FOR THE PRODUCTION &
EXPORT OF GREEN BUILDING MATERIALS IN ASIA

BOOST DOMESTIC AND INTERNATIONAL TRADE IN
SUSTAINABLE BUILDING MATERIALS

STRENGTHEN INTERNATIONAL COOPERATION IN
MANUFACTURING, TECHNOLOGY, & GREEN BUILDING APPLICATIONS

THE EXHIBITION IS NOT MERELY A PLATFORM FOR SHOWCASING PRODUCTS,
BUT A STRATEGIC HUB FOR CONNECTION - A STARTING POINT FOR SUSTAINABLE
PARTNERSHIPS IN THE GREEN BUILDING SECTOR ACROSS THE ASIA-PACIFIC REGION

EXHIBITORS

- High-tech building materials manufacturers
- Suppliers of production lines, machinery, and automation systems
- Developers of smart construction and green materials
- Modular construction and structural solution providers
- Contractors, real estate developers, architects, and design firms
- Importers and distributors of premium materials
- R&D institutes, laboratories, and material startups
- Automation and digitalization solution providers
- Environmental and renewable energy technology companies

B2B MATCHING

- International Buyers
- Contractors & EPC Firms
- Green Project Developers
- Distributors & Retailers
- Manufacturers Seeking Equipment

VISITORS

- International buyers and sourcing agents
- Commercial traders and machinery distributors
- Investors in industrial & civil construction
- Green project developers and real estate firms
- Design and engineering consultants
- Construction contractors, EPC firms, project managers
- Universities, research institutions, certification centers
- Government agencies and regulatory authorities

MAIN CATEGORIES

- Raw Materials
- Green Building Material Products
- Equipment & Production Technologies
- Automation & Digitalization
- Hi-tech & Smart Interior and Exterior Solutions
- Green Building Design & Architectural Solutions
- Heavy Construction Equipment
- Finishing Equipment
